Milk – State Beverage

Article 1, Section 10 of the North Carolina Constitution (1971) states that "Milk shall be the State Beverage." This was a result of a referendum held in 1971. The referendum was passed by a majority of voters, and it was the first time that a referendum was used to change the state constitution. The referendum was a result of a long campaign by the dairy industry to have milk designated as the state beverage. The campaign was led by the North Carolina Dairy Farmers' Association, which had been working for this goal for many years. The referendum was a significant victory for the dairy industry, and it helped to establish milk as the state beverage of North Carolina.

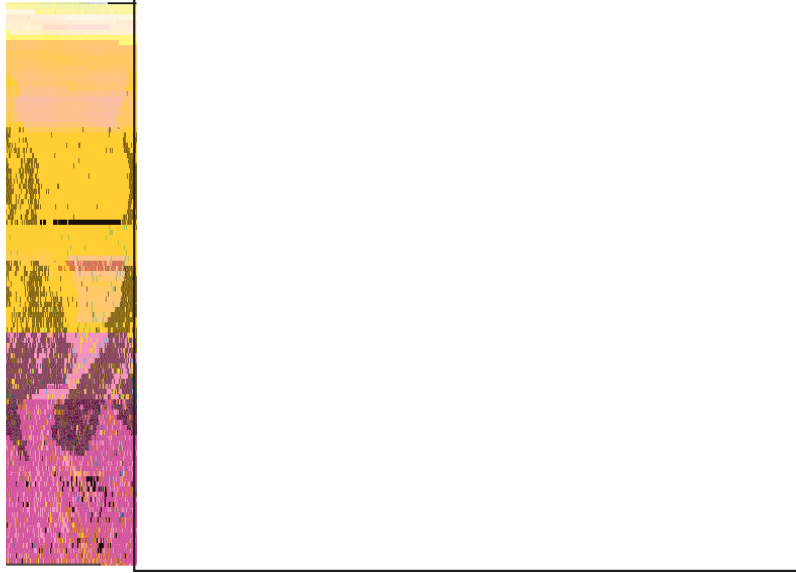

The Plott Hound – State Dog

“The Plott Hound” is a breed of dog that was first brought to North Carolina by a man named Plott in 1750. It is a large, powerful breed that is known for its loyalty and intelligence. The breed was first recognized as a distinct breed in 1989. It is a breed that is highly valued for its ability to protect its family and its territory. The breed is also known for its ability to hunt and track. The breed is a breed that is highly respected and loved in North Carolina.
